FOCUS

Professional Monitoring Headphones

Thank you for purchasing Fluid Audio Focus headphones; The result of world-class engineering and meticulous manufacturing. Our headphones are designed to provide you with outstanding performance and exceptional value, and with proper care, Focus headphones will provide many years of listening satisfaction. For best results, please take a few moments to review our user guide.

General

Fluid Audio Focus headphones are a semi-closed back, over-ear design for studio tracking, mixing, mastering and casual listening.
They use 50mm neodymium magnet drivers with lightweight diaphragms delivering users with an extremely detailed and responsive performance.

The headband is made of a soft, comfortable vinyl material that flexes and adjusts automatically to your head as you put it on. The durable metal and plastic construction ensures years of dependable use.

Included is a 3m / 10ft attached cord with 3.5mm connector and 6.5mm gold adaptor for use with most recording interfaces, and a convenient carrying pouch.

Also included is Realphones software that allows you to optimize the response of the Focus headphones and also mimic sound reproduction in a physical recording studio control room.

Accessories

- Focus headphones
- Carrying pouch
- Plug adaptor 3.5mm/6.3mm
- Realphones software

Features

- 50mm neodymium magnet speaker drivers
- Balanced and articulate response
- Solid metal/plastic construction, comfortable and durable
- Semi-open, circumaural design
- Gold plated output connectors

Specifications

Frequency range :	20Hz-20kHz
Nominal sound pressure :	> 90dB
Rated impedance :	32Ω
Driver size:	50mm neodymium
Acoustic design :	Semi-open, circumaural
Max Power :	300 mW
Connector :	3.5mm with 6.3mm adaptor
Nominal headband pressure :	3.5Nm
Transducer type :	Dynamic
Nominal THD :	< 0.2%
Cable length :	3 meters
