

User Manual

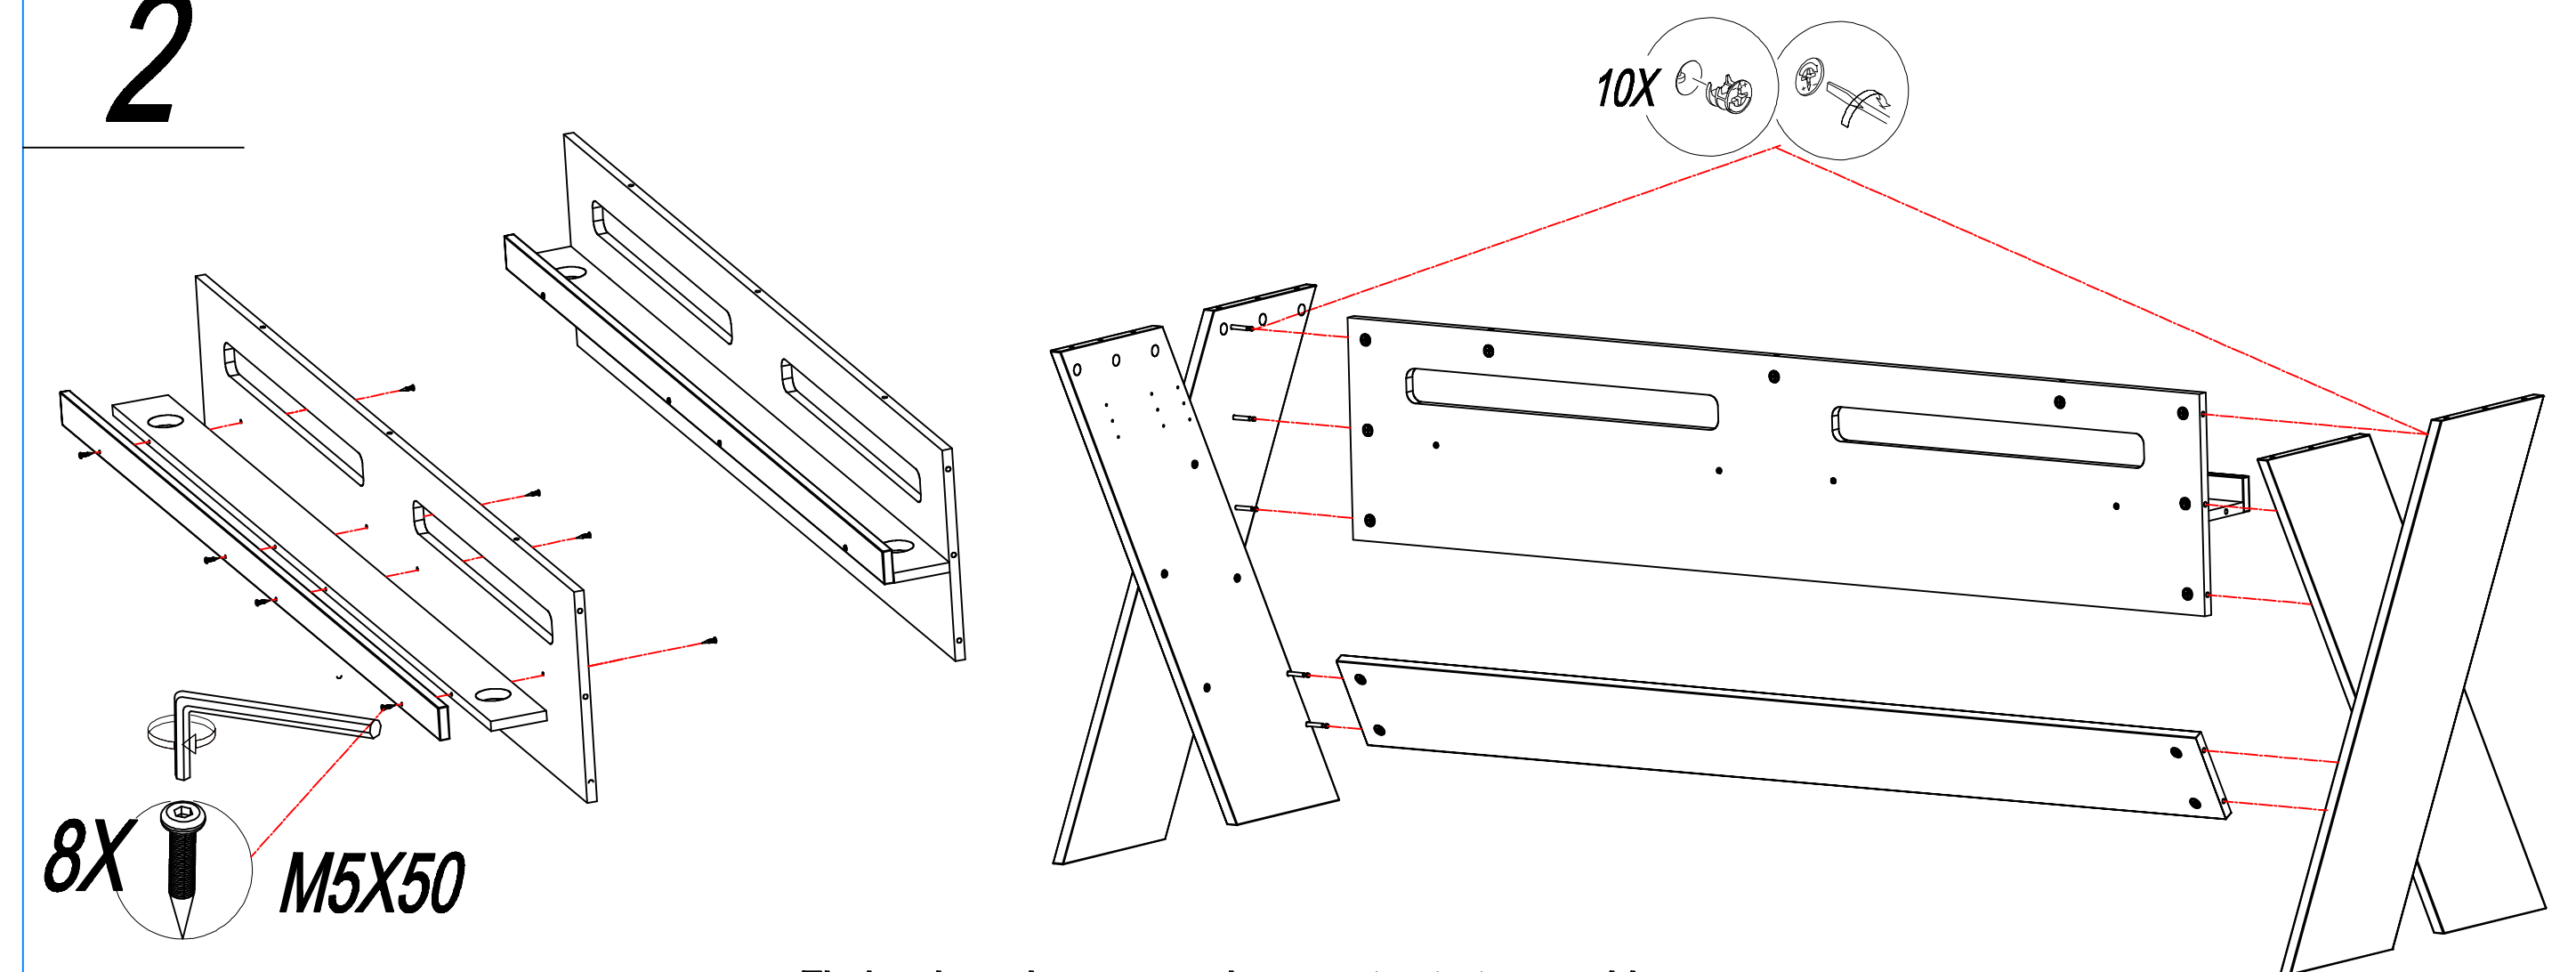

1

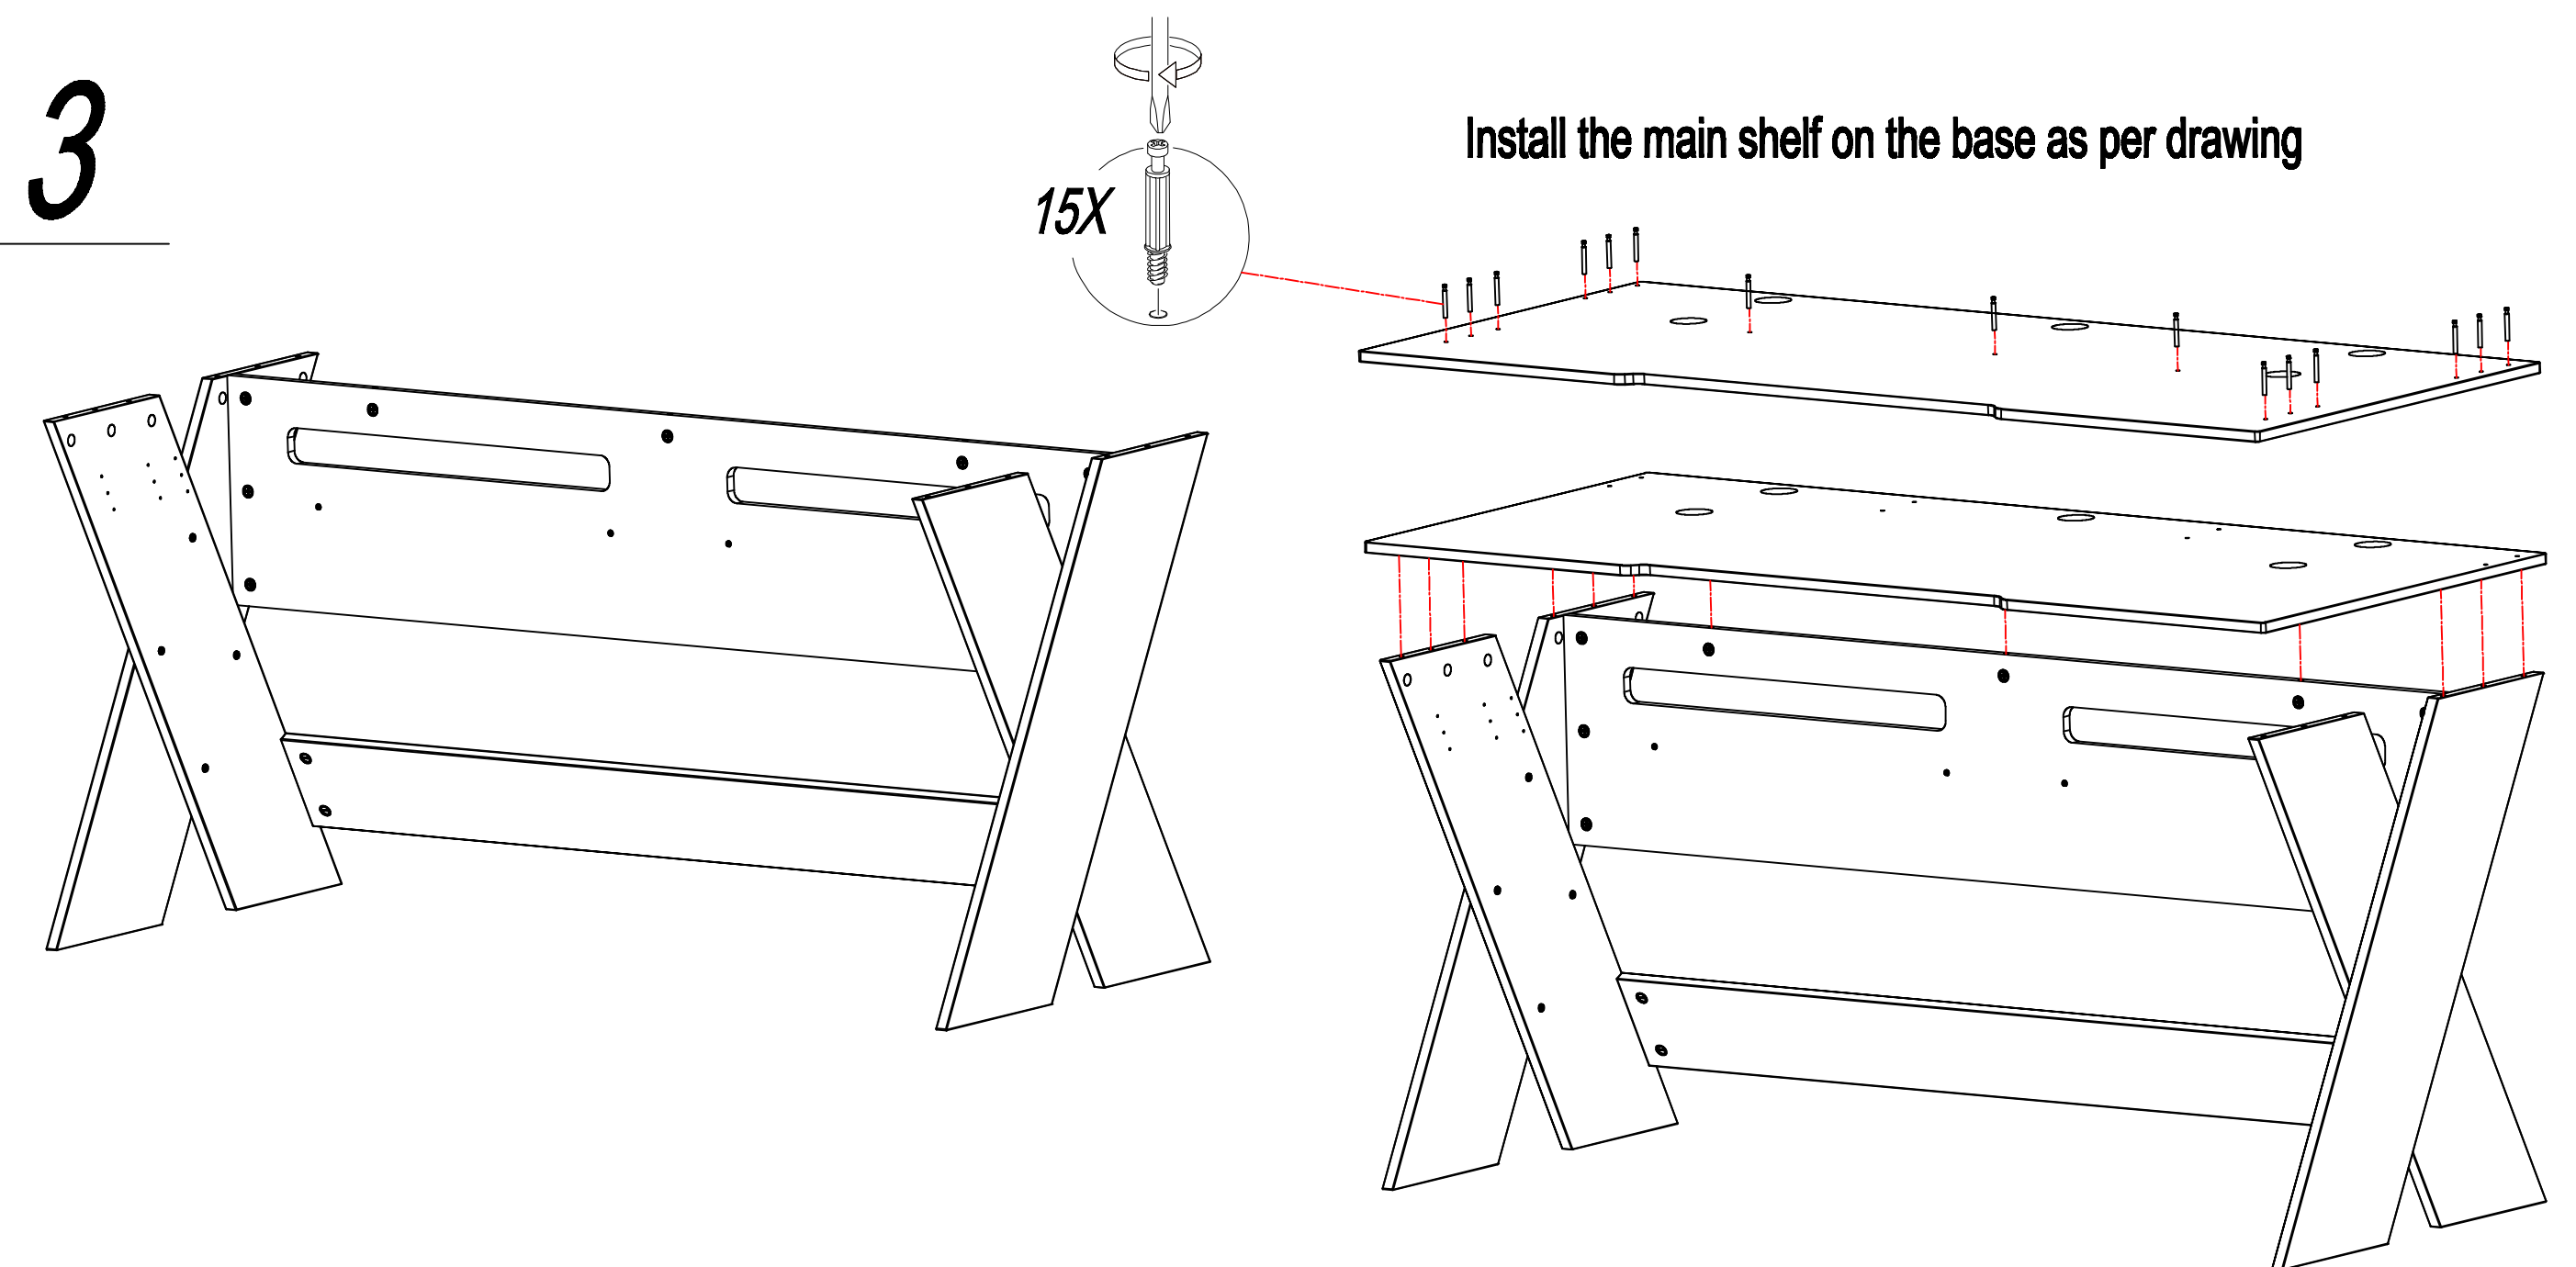

Find a clean, large enough space to start assembly.
Assemble the leg boards into 2 X as per the drawings above, make sure the directions are all correct.

2

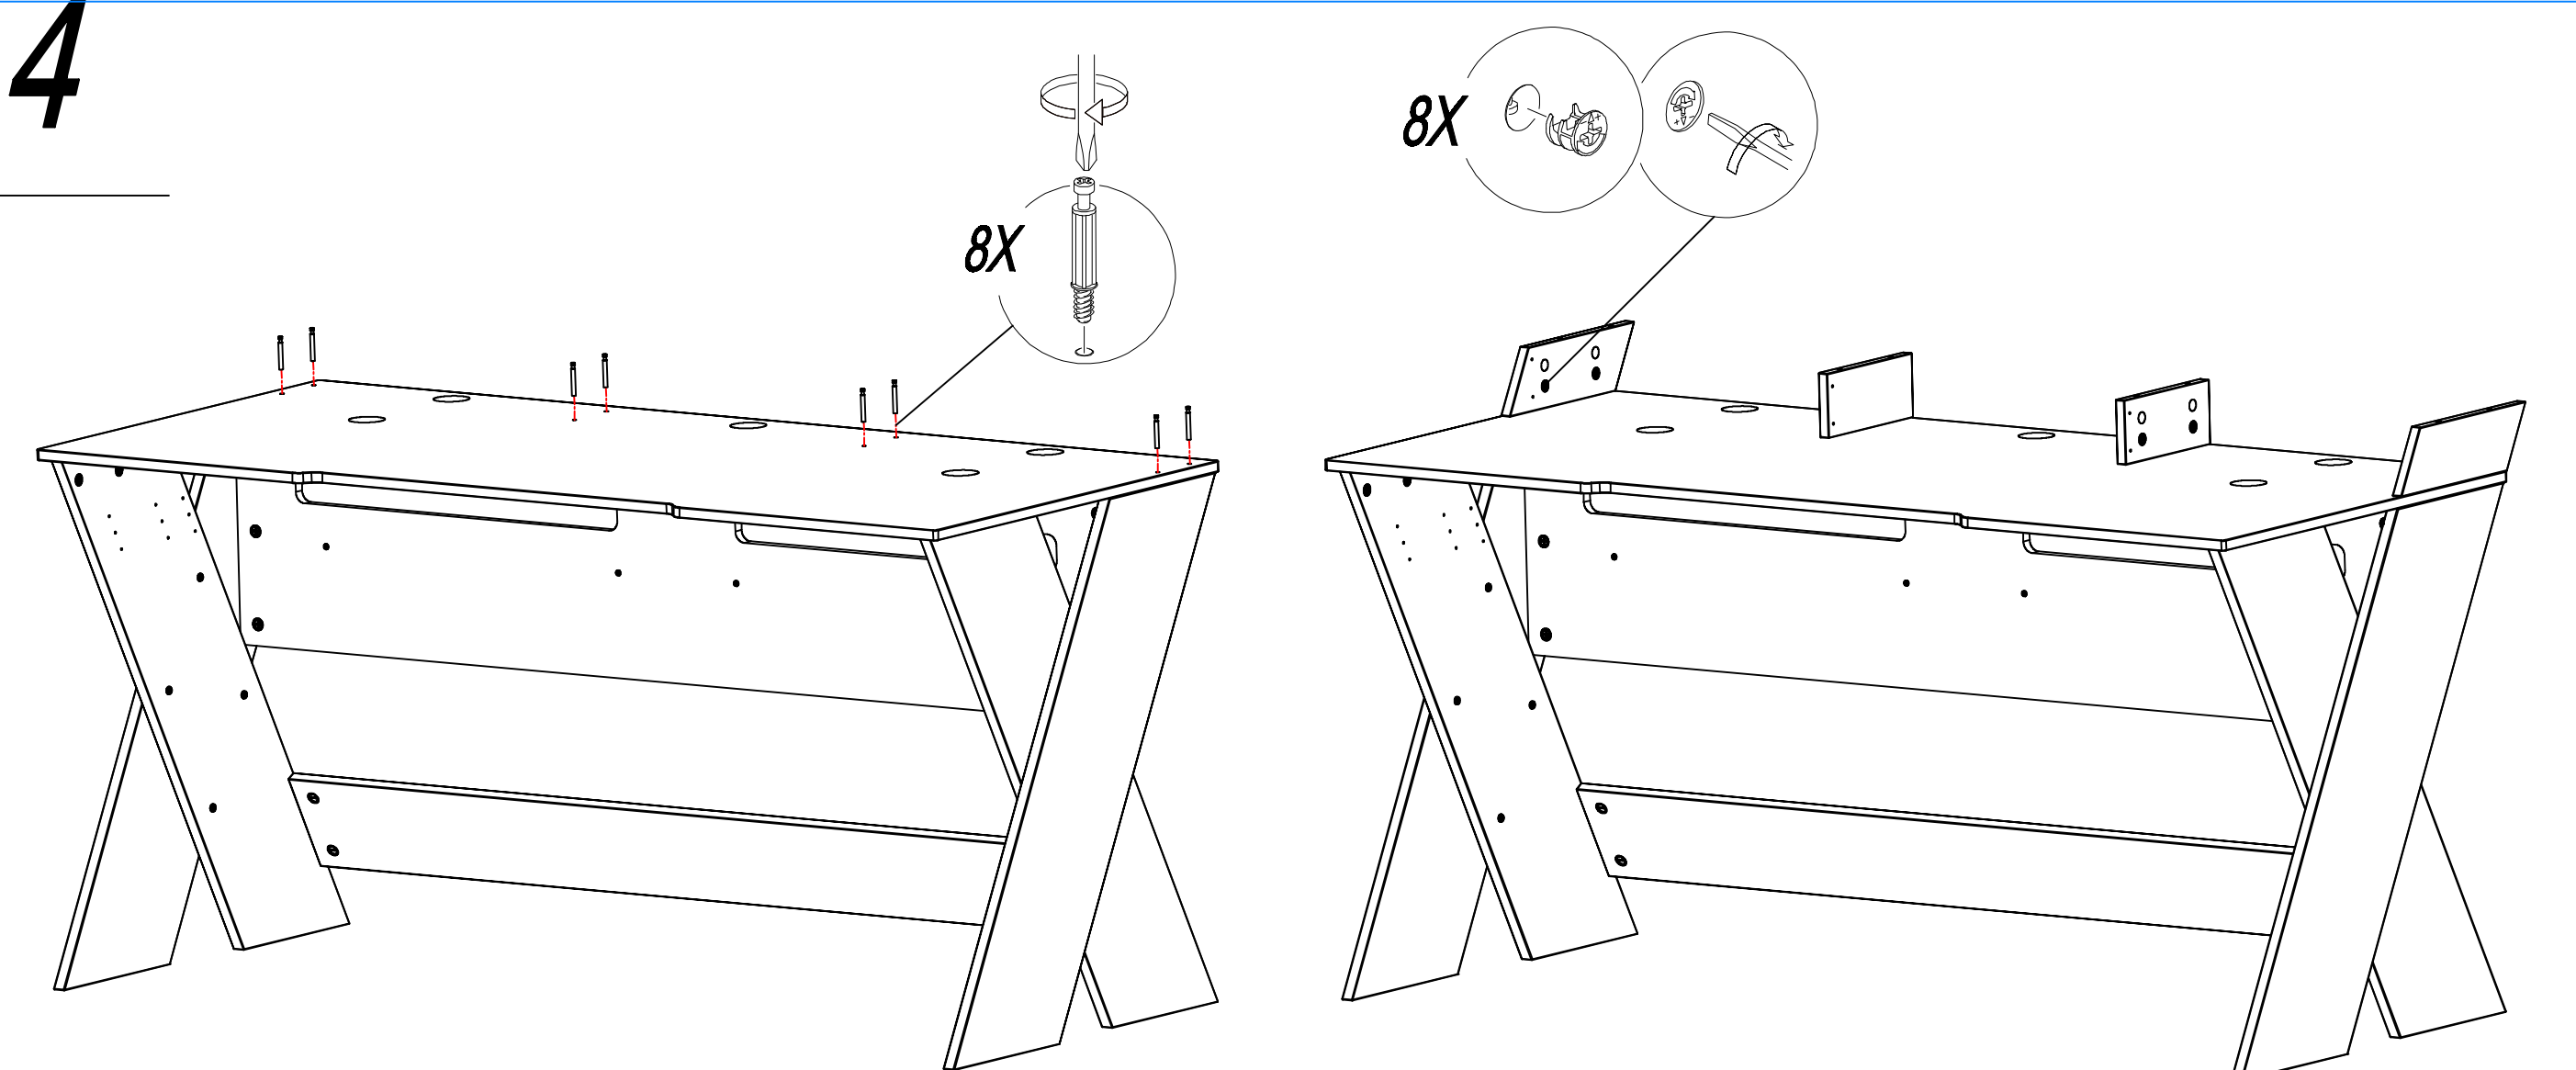

Find a clean, large enough space to start assembly.
Assemble the leg boards into 2 X as per the drawings above, make sure the directions are all correct.

3

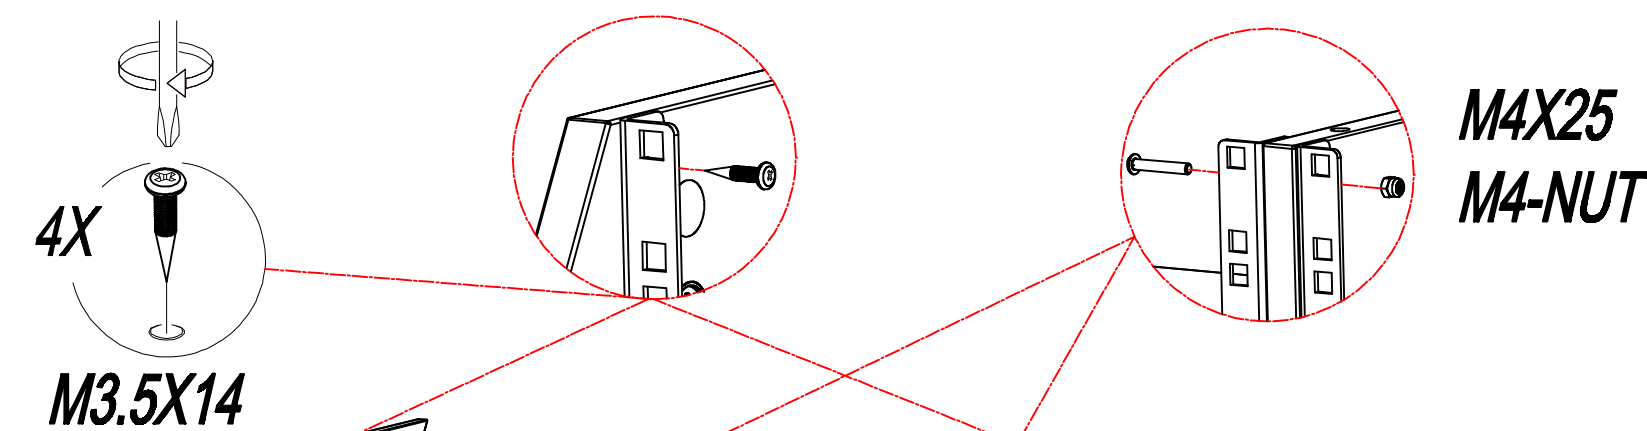

Install the main shelf on the base as per drawing

4

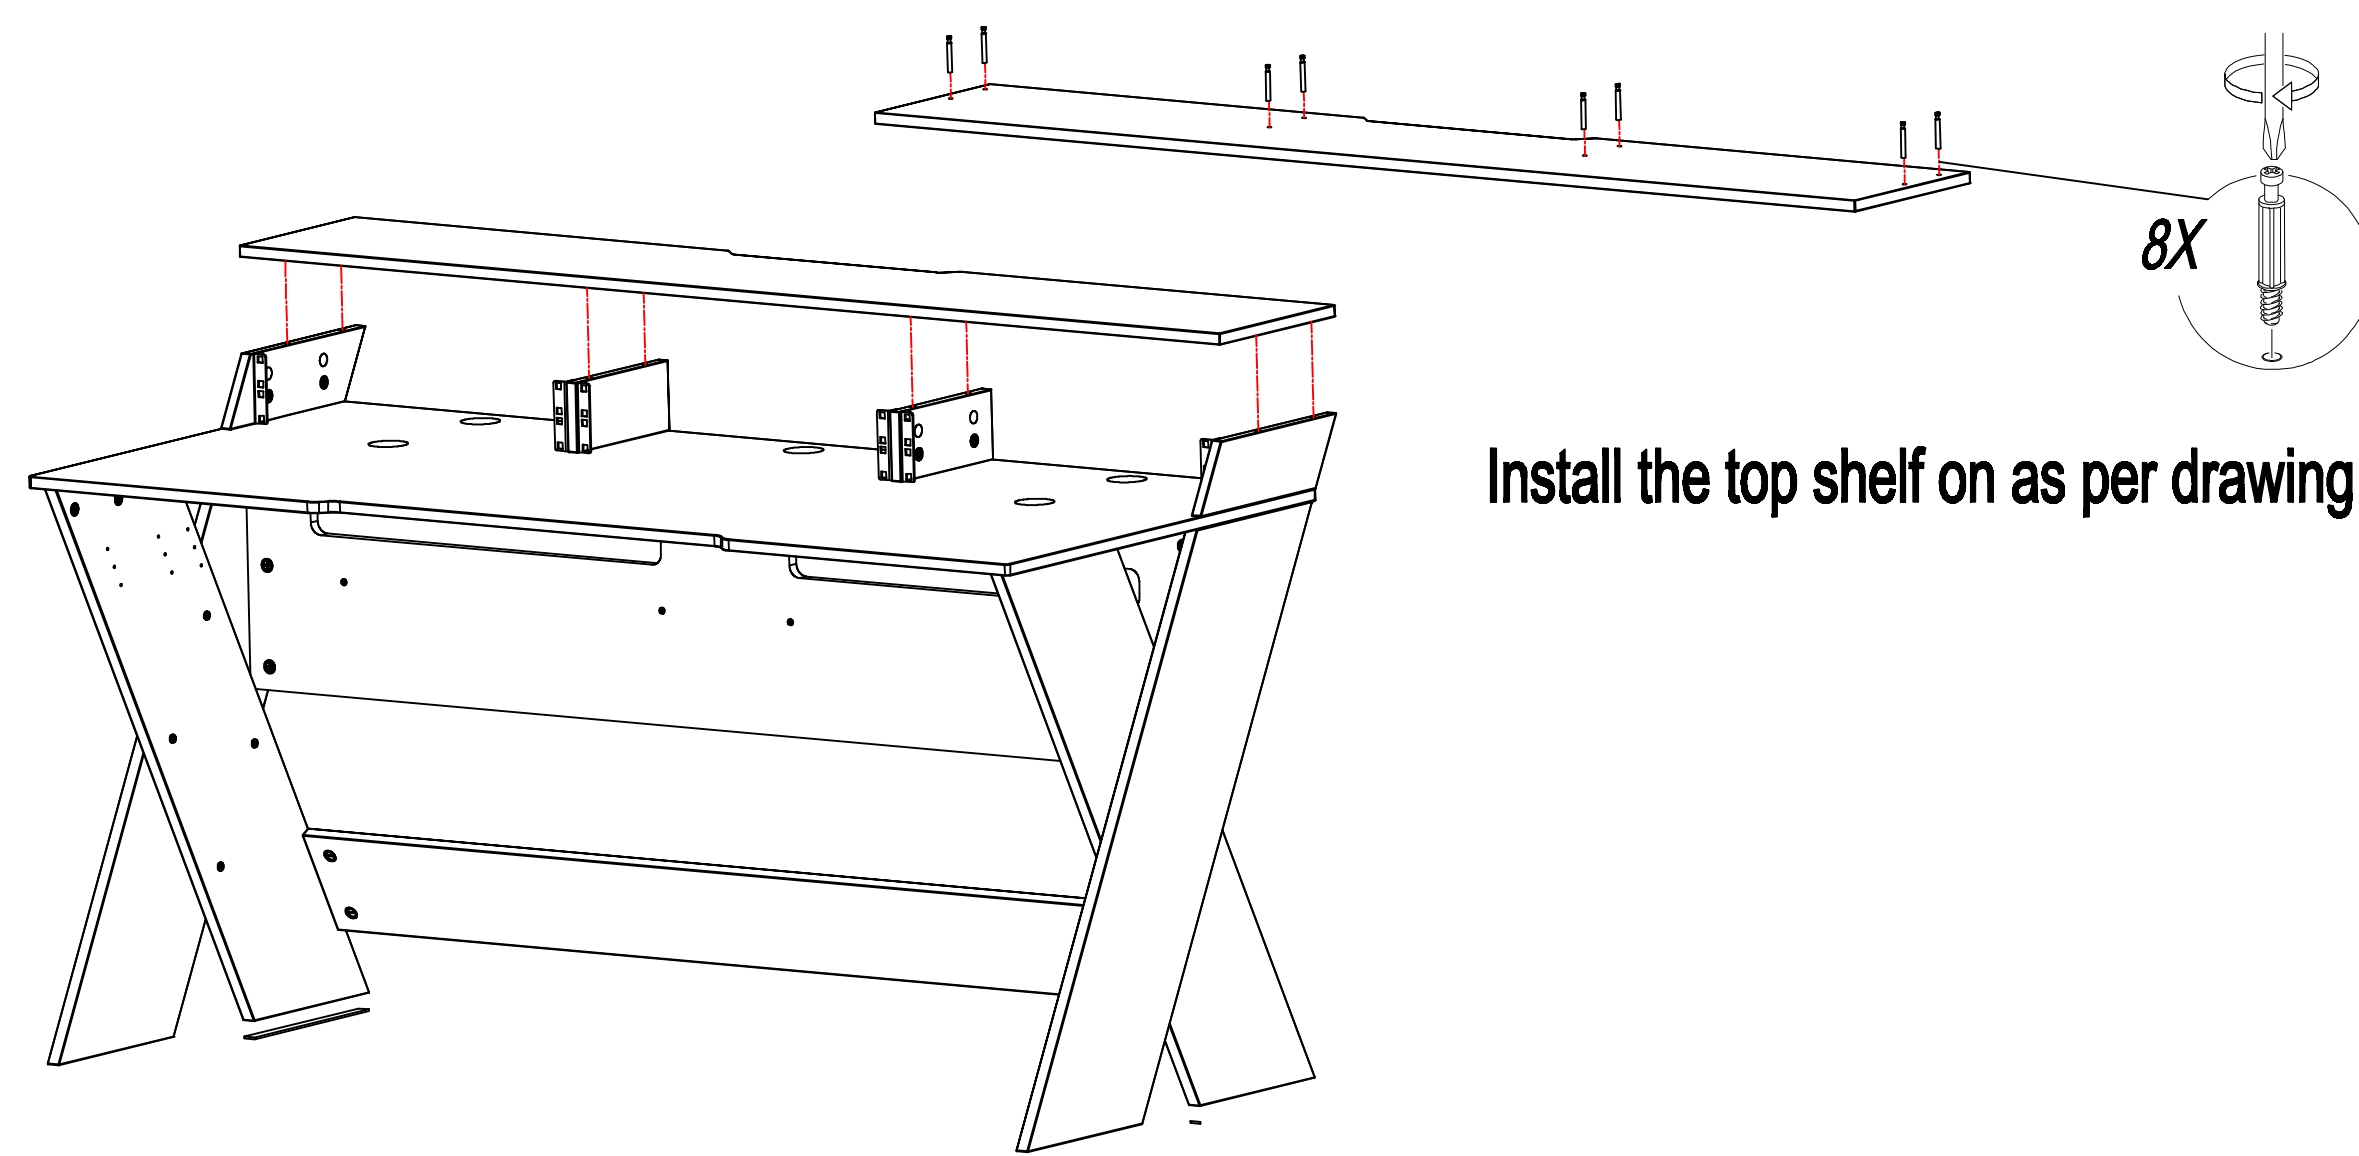

Install 4 vertical boards on the main shelf as per drawing, please make sure they are in the right direction as the small holes or pilot holes are in front for installing the rack rails in the next step.

5

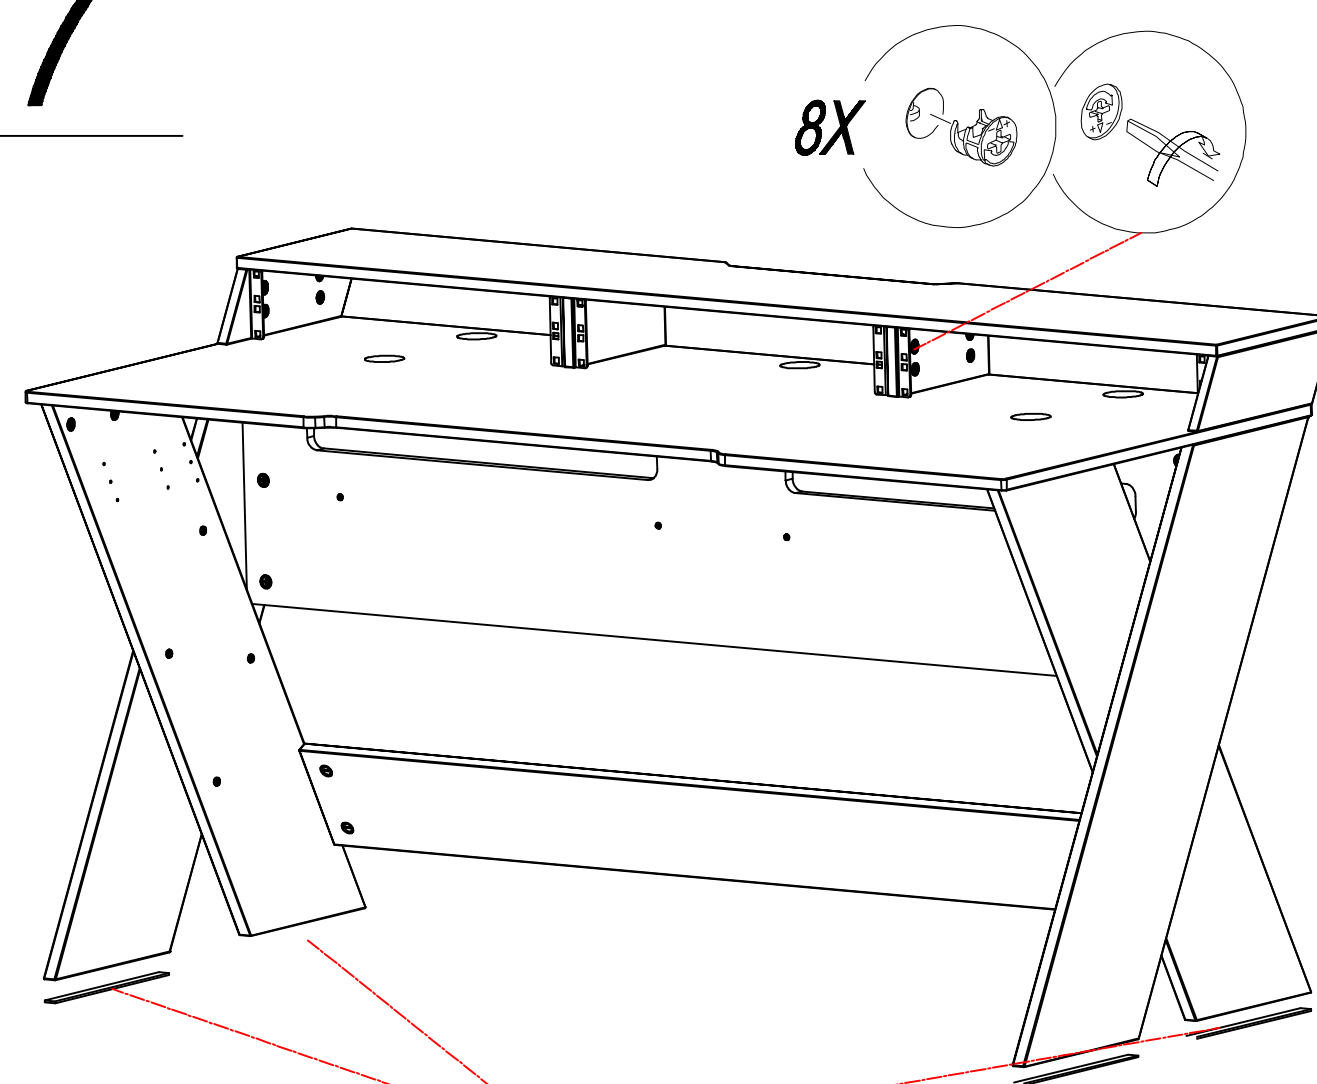

Install the rack rails on the vertical boards, please note on two side boards use Self tapping screws and on two middle boards need to use bolts and nuts. (The hole position may not align very well so please redrill the holes incase need)

6

Install the top shelf on as per drawing

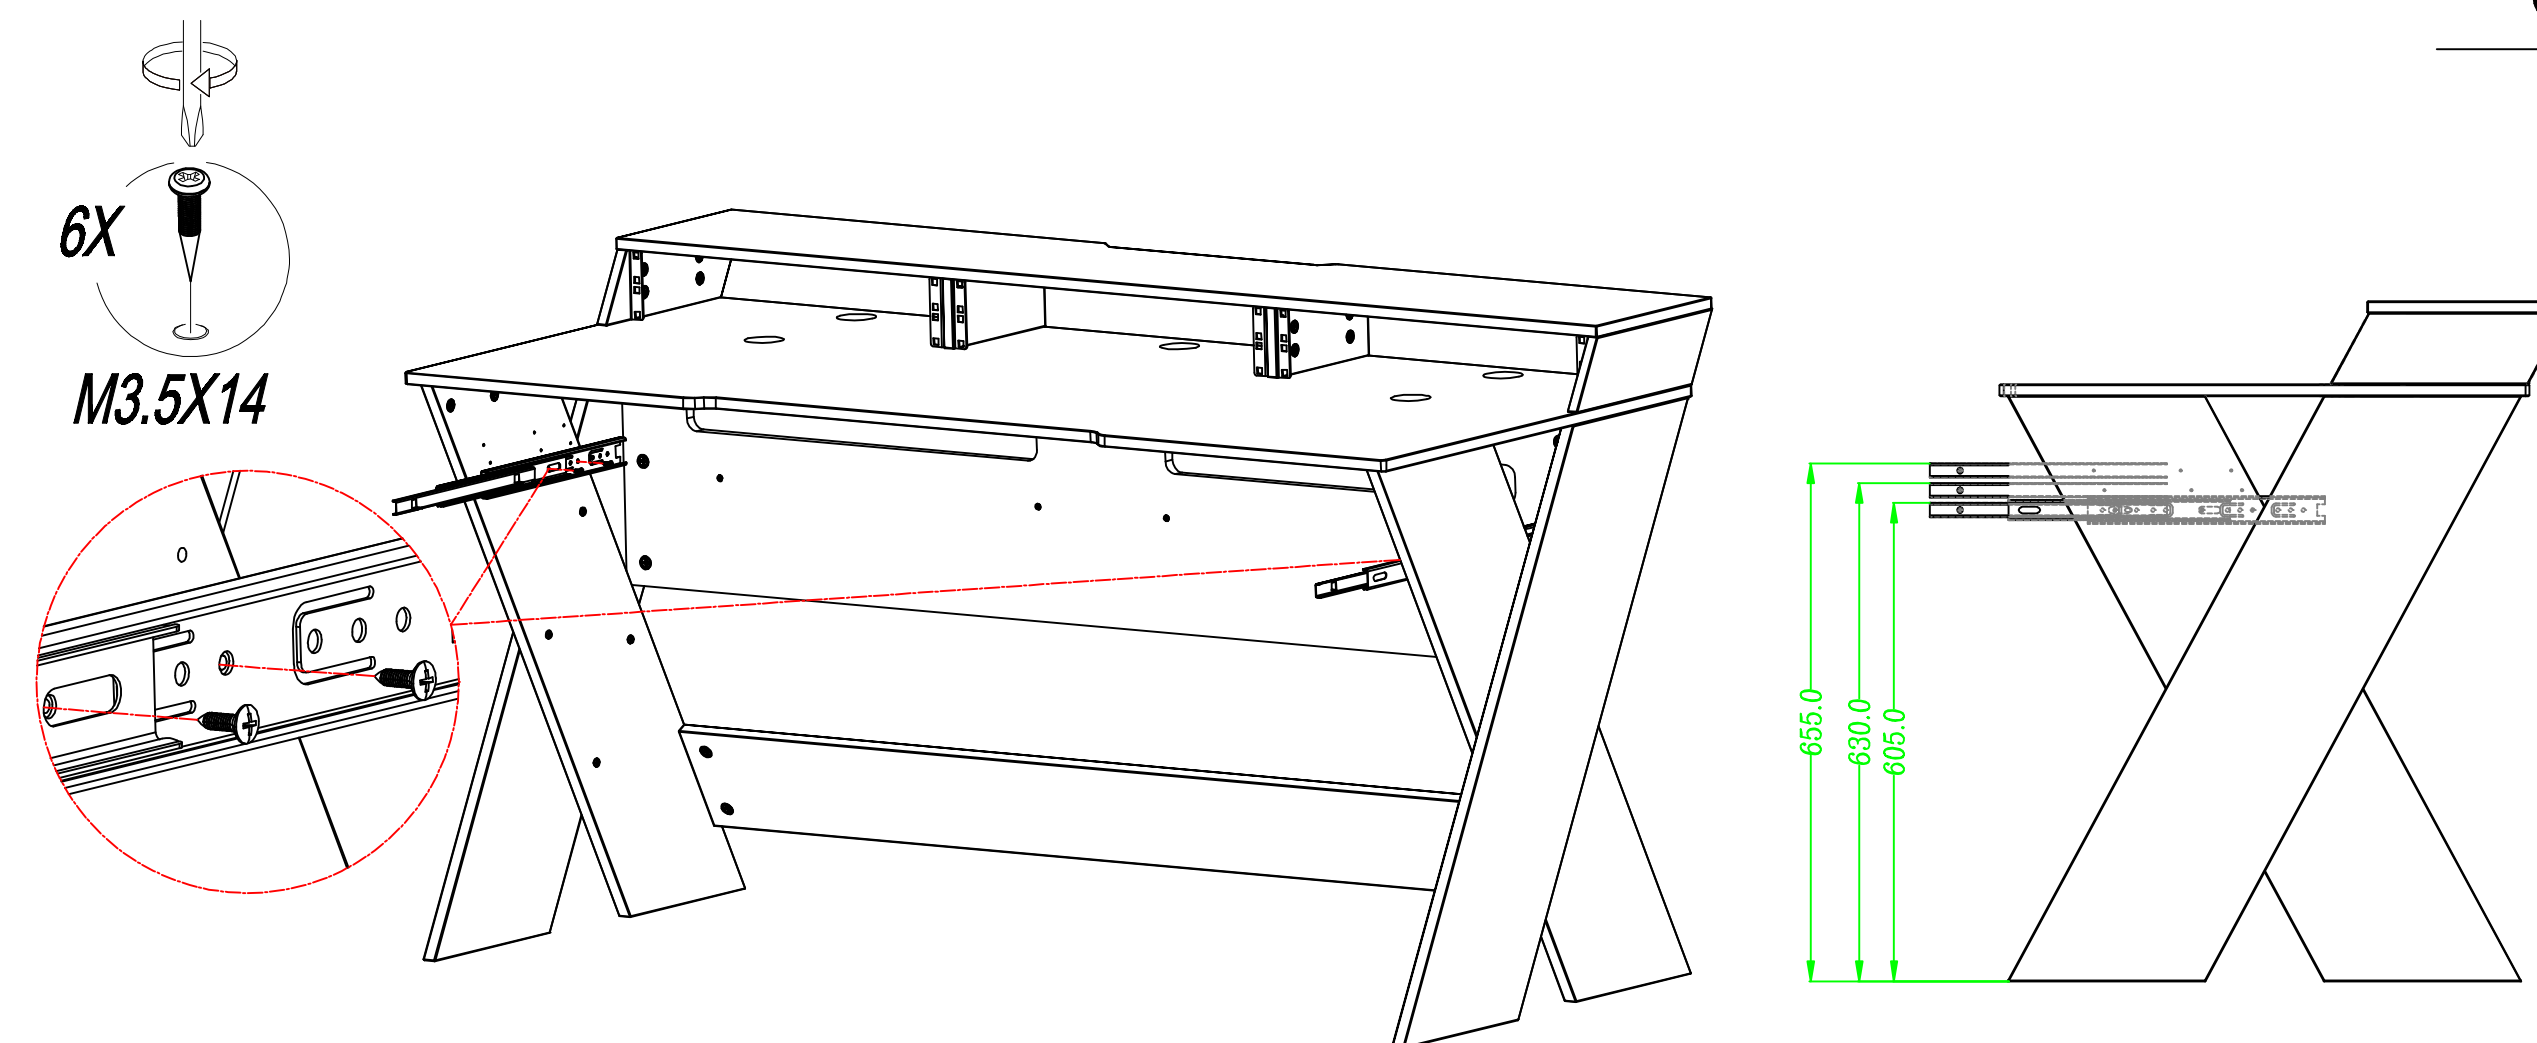

7

EVA

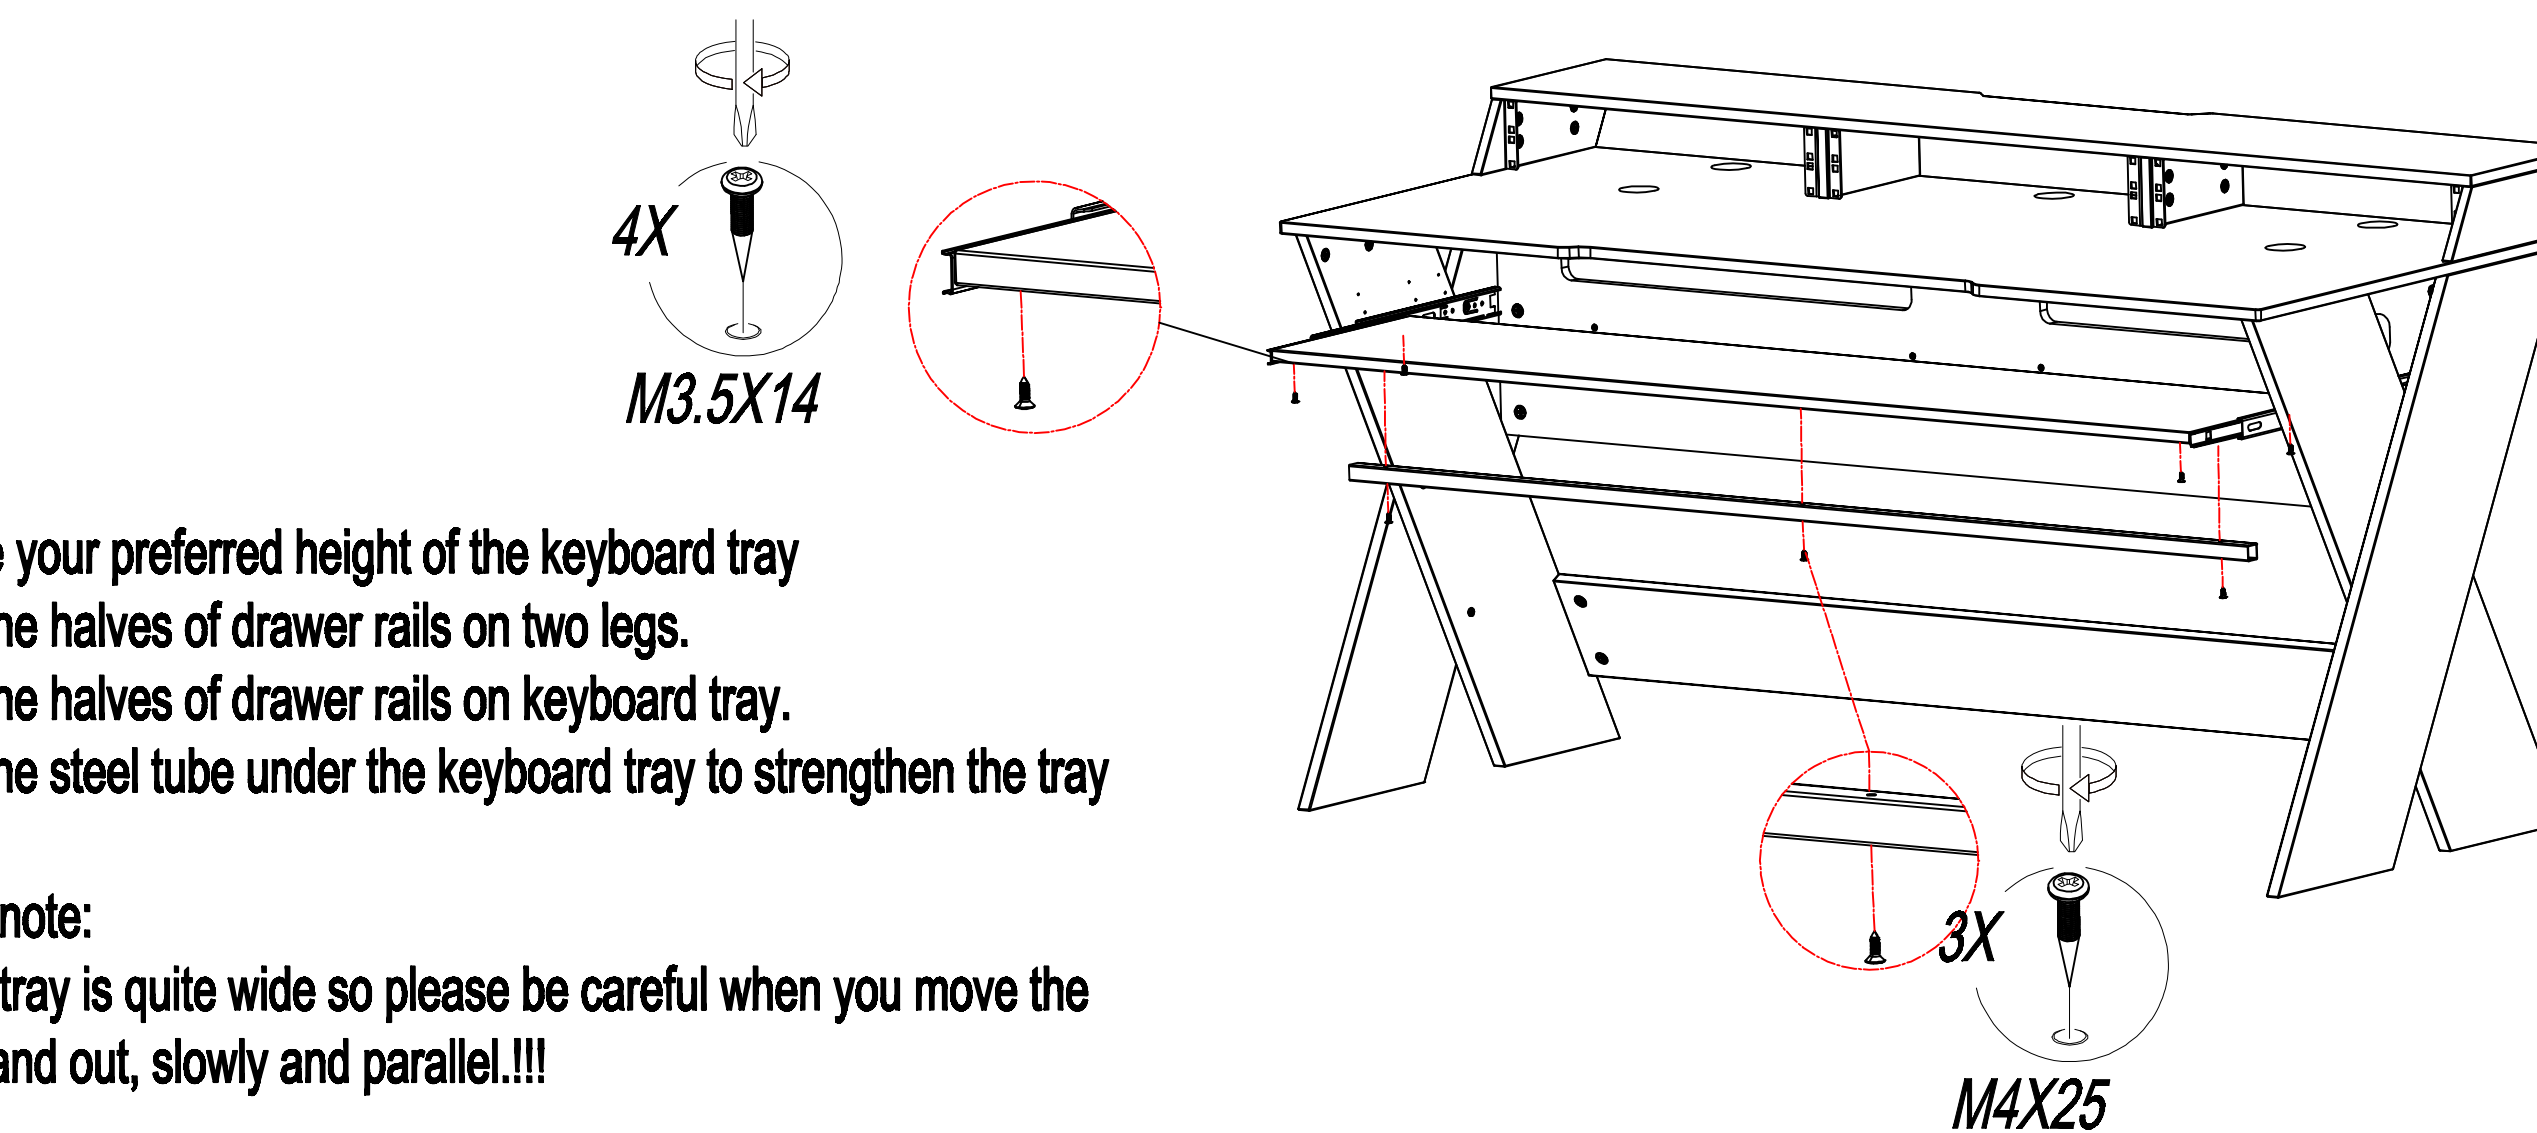

Tighten all bolts, nuts on all the connections and now the stand is ready to use
Please note:
1. Don't hit the bottom connecting board hardly, otherwise it will break
2. Please put on stickers to cover the head of screws or nuts for better looking purpose.
3. Please stick the rubber pads under the legs to reduce the vibration or uneven floor
4. Tighten the nuts and bolts and screws after the use of a period of time.
5. You can cover the cable holes via covers enclosed

8

Choose your preferred height of the keyboard tray
Install the halves of drawer rails on two legs.
Install the halves of drawer rails on keyboard tray.
Install the steel tube under the keyboard tray to strengthen the tray

Please note:
As this tray is quite wide so please be careful when you move the tray in and out, slowly and parallel.!!!

keyboard board is sold separately so neglect some of these steps if you don't order the keyboard board
